Dear Sir/Madam,

EA Amendment – P-EA-100535319

Redemption Resources Pty Ltd (RR PL) has lodged a mining lease application (ML100436) in the Clermont region. The EA amendment application is to include this new mining lease into the existing project EA P-EA-100535319.

It is reasonably considered that the current standard conditions are sufficient to manage this activity.

It is considered that the proposed amendment is minor for the following reasons:

- EA EPVL04189416 is a standard EA.
- Wet and dry alluvial processing is consistent with the standard EA.
- Current total unrehabilitated significant disturbance is <2ha.
- The mine disturbance within the alluvial systems is <0.75ha.
- Progressive rehabilitation has been completed.
- Future activities are expected to remain within these limits.
- There are no Category A or Category B areas as defined by Schedule 19 of the *Environmental Protection Regulation 2019* within any of the project MLs.
- The activity otherwise complies with the Code of Environmental Compliance Mining Lease Projects and the associated eligibility criteria.

Please do not hesitate to contact this office if you require any further information.

Yours sincerely,

Rod Coe
