Dear Sir/Madam,

**Environmental Authority P-EA-100421677 Amendment Application**

Dennis Plant has lodged a mining lease application (ML100464) in the Clermont area for alluvial, colluvial and elluvial gold. The application is for a standard EA is to include this new mining lease. The applicant can comply with the *'Eligibility criteria and standard conditions for mining lease activities'*.

The mining lease covers an extended are over ML70438 and is located approximately 108 metres from mapped Endangered Regional Ecosystem (ERE) 11.4.8/11.11.2 at its closest point on the western boundary. ML70438 is located approximately 160m from the ERE at its closest point on the southeastern side. For this reason, the applicant is unable to comply with condition A13 as activities will be carried out within 1 km of a Category B environmentally sensitive area (ERE).

Mining activity will involve progressively excavating material and metal detecting with processing of any encountered finer gold with a mobile dry blower. All material will be replaced into the mine excavation with topsoil material salvaged separately and placed over the recontoured surface with any cleared vegetation. An overburden bund will be used to separate the mine excavation from any drainage towards the mapped ERE to ensure any eroded material is retained and does not unduly affect the ERE. Rehabilitation will be undertaken progressively to limit the period of time that the mine excavation is open in any particular location. Records will be maintained of the mining and rehabilitation activity.

Please do not hesitate to contact this office if you require any further information.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Rod Coe'.
